Author index

Albracht, S.P.J., see Van Belzen, R. (974) 311

Andersson, L.A., Loehr, T.M., Cotton, T.M., Simpson, D.J. and Smith, K.M.
Spectroscopic analysis of chlorophyll model complexes: methyl ester ClFe(III)pheophorbides (974) 163

Babcock, G.T., see Ghanotakis, D.F. (974) 44

Bader, K.P. and Schmid, G.H.
Photosynthetic and respiratory oxygen gas exchange measured by mass spectrometry in the filamentous cyanobacterium *Oscillatoria chalybea* in dependence on the nitrogen source in the growth medium (974) 303

Berden, J.A., see Schoppink, P.J. (974) 192

Bernaert, I., see Biermans, W. (974) 74

Bickel-Sandkötter, S. and Gokus, M.
Characterization of nucleotide binding sites on membrane-bound chloroplast ATPase by modification with pyridoxal 5′-phosphate (974) 30

Biermans, W., Bernaert, I., De Bie, M., Nijs, B. and Jacob, W.
Ultrastructural localisation of creatine kinase activity in the contact sites between inner and outer mitochondrial membranes of rat myocardium (974) 74

Bizouarn, T., De Kouchkovsky, Y. and Haraux, F.
Photophosphorylation at variable ADP concentration but constant ΔpH in lettuce thylakoids. Effect of ΔpH and phosphate on the apparent affinity for ADP (974) 104

Blubaugh, D.J., see Shopes, R.J. (974) 114

Boekema, E.J., Dekker, J.P., Rögner, M., Witt, I., Witt, H.T. and Van Heel, M.
Refined analysis of the trimeric structure of the isolated Photosystem I complex from the thermophilic cyanobacterium *Synechococcus* sp. (974) 81

Bose, S., see Renganathan, M. (974) 247

Bowlby, N.R., see Ghanotakis, D.F. (974) 44

Bragg, P.D. and Hou, C.
Reaction of 2-azido-ATP with β subunits in the F_1-adenosine triphosphatase of *Escherichia coli* (974) 24

Briantais, J.-M., see Hodges, M. (974) 289

Brimble, S., see Bruce, D. (974) 66

Bruce, D., Brimble, S. and Bryant, D.A.
State transitions in a phycobilisome-less mutant of the cyanobacterium *Synechococcus* sp. PCC 7002 (974) 66

Bryant, D.A., see Bruce, D. (974) 66

Camm, E.L. and Green, B.R.
The chlorophyll *ab* complex, CP29, is associated with the Photosystem II reaction centre core (974) 180

Cornic, G., see Hodges, M. (974) 289

Cotton, T.M., see Andersson, L.A. (974) 163

Crielaard, W., Gabellini, N., Hellingwerf, K.J. and Konings, W.N.
Functional reconstitution of photosynthetic cyclic electron transfer in liposomes (974) 211

De Bie, M., see Biermans, W. (974) 74

Dekker, J.P., see Boekema, E.J. (974) 81

Dekker, J.P., see Meyer, B. (974) 36

De Kouchkovsky, Y., see Bizouarn, T. (974) 104

Demetriou, D.M., see Ghanotakis, D.F. (974) 44

De Paula, J.C., see Ghanotakis, D.F. (974) 44

Duhe, R.J. and Selman, B.R.
Studies on the heterogeneity of the soluble chloroplast coupling factor 1: the formation of ϵ-deficient isozymes (974) 294

Feezel, L.L., Gast, P., Smith, U.H. and Thurnauer, M.C.
Electron spin polarization of P^+-870Q^- observed in the reaction center protein of the photosynthetic bacterium *Rhodobacter sphaeroides* R-26. The effect of selective isotopic substitution at X- and Q-band microwave frequencies (974) 149

Fuggi, A.
Short-term regulation of nitrate uptake by a 'pump and leak' mechanism in the acidophilic nonvacuolated alga, *Cyanidium caldarium* (974) 141

Gabellini, N., Gao, Z., Oesterhelt, D., Venturoli, G. and Melandri, B.A.
Reconstitution of cyclic electron transport and photophosphorylation by incorporation of the reaction center, cytochrome b/c_1 complex and ATP synthase from *Rhodobacter capsulatus* into ubiquinone-10/phospholipid vesicles (974) 202

Gabellini, N., see Crielaard, W. (974) 211

Gao, Z., see Gabellini, N. (974) 202

Gast, P., see Feezel, L.L. (974) 149

Ghanotakis, D.F., De Paula, J.C., Demetriou, D.M., Bowlby, N.R., Petersen, J., Babcock, G.T. and Yocum, C.F.
Isolation and characterization of the 47 kDa protein and the D1-D2-cytochrome *b*-559 complex (974) 44

Gokus, M., see Bickel-Sandkötter, S. (974) 30

Govindjee, , see Shopes, R.J. (974) 114

Green, B.R., see Camm, E.L. (974) 180

Greenbaum, N.L., see Mauzerall, D. (974) 119

Haraux, F., see Bizouarn, T. (974) 104

Harris, D.A.
Azide as a probe of co-operative interactions in the mitochondrial F_1-ATPase (974) 156

Hassinen, I.E., see Kiviluoma, K.T. (974) 274

Hassinen, I.E., see Vuokila, P.T. (974) 219

Hauska, G., see Nitschke, W. (974) 223

Hellingwerf, K.J., see Crielaard, W. (974) 211

Hemrika, W., see Schoppink, P.J. (974) 192

Hodges, M., Cornic, G. and Briantais, J.-M.
Chlorophyll fluorescence from spinach leaves: resolution of non-photochemical quenching (974) 289

Hoff, A.J., see Lous, E.J. (974) 88

Hou, C., see Bragg, P.D. (974) 24

Inoue, Y., see Seibert, M. (974) 185

Islam, K.
GTP-induced chloroplast membrane protein phosphorylation and Photosystem II fluorescence changes: evidence for multiple protein kinase activities (974) 261

Islam, K.
Thylakoid protein phosphorylation and associated Photosystem II fluorescence changes: a study with the ATP analogue adenosine-5-*O*-thiotriphosphate (ATP-γ-S) (974) 267

Jacob, W., see Biermans, W. (974) 74

Kiviluoma, K.T., Peuhkurinen, K.J. and Hassinen, I.E.
Adenine nucleotide transport and adenosine production in isolated rat heart mitochondria during acetate metabolism (974) 274
Konings, W.N., see Crielaard, W. (974) 211
Krämer, R. and Palmieri, F.
Molecular aspects of isolated and reconstituted carrier proteins from animal mitochondria (974) 1

Loehr, T.M., see Andersson, L.A. (974) 163
Lous, E.J. and Hoff, A.J.
Isotropic and linear dichroic triplet-minus-singlet absorbance difference spectra of two carotenoid-containing bacterial photosynthetic reaction centers in the temperature range 10–288 K. An analysis of bacteriochlorophyll-carotenoid triplet transfer (974) 88

Maier, R.J., see O'Brian, M.R. (974) 229
Mauzerall, D. and Greenbaum, N.L.
The absolute size of a photosynthetic unit (974) 119
Melandri, B.A., see Gabellini, N. (974) 202
Meyer, B., Schlodder, E., Dekker, J.P. and Witt, H.T.
O_2 evolution and Chl a_{II}^+ (P-680$^+$) nanosecond reduction kinetics in single flashes as a function of pH (974) 36

Nijs, B., see Biermans, W. (974) 74
Nitschke, W., Hauska, G. and Rutherford, A.W.
The inhibition of quinol oxidation by stigmatellin is similar in cytochrome bc_1 and b_6f complexes (974) 223

O'Brian, M.R. and Maier, R.J.
Molecular aspects of the energetics of nitrogen fixation in *Rhizobium*-legume symbioses (974) 229
Oesterhelt, D., see Gabellini, N. (974) 202

Palmieri, F., see Krämer, R. (974) 1
Petersen, J., see Ghanotakis, D.F. (974) 44
Peuhkurinen, K.J., see Kiviluoma, K.T. (974) 274
Pick, U., see Weiss, M. (974) 254

Quick, P., Scheibe, R. and Stitt, M.
Use of tentoxin and nigericin to investigate the possible contribution of ΔpH to energy dissipation and the control of electron transport in spinach leaves (974) 282

Renganathan, M. and Bose, S.
Inhibition of primary photochemistry of Photosystem II by copper in isolated pea chloroplasts (974) 247
Rögner, M., see Boekema, E.J. (974) 81
Rutherford, A.W., see Nitschke, W. (974) 223

Scheibe, R., see Quick, P. (974) 282
Schlodder, E., see Meyer, B. (974) 36
Schmid, G.H., see Bader, K.P. (974) 303
Schoppink, P.J., Hemrika, W. and Berden, J.A.
The effect of deletion of the genes encoding the 40 kDa subunit II or the 17 kDa subunit VI on the steady-state kinetics of yeast ubiquinol–cytochrome-*c* oxidoreductase (974) 192
Sebban, P. and Wraight, C.A.
Heterogeneity of the $P^+Q_A^-$ recombination kinetics in reaction centers from *Rhodopseudomonas viridis*: the effects of pH and temperature (974) 54
Seibert, M., Tamura, N. and Inoue, Y.
Lack of photoactivation capacity in *Scenedesmus obliquus* LF-1 results from loss of half the high-affinity manganese-binding site. Relationship to the unprocessed D1 protein (974) 185
Sekler, I., see Weiss, M. (974) 254
Selman, B.R., see Duhe, R.J. (974) 294
